Welcome to: *On The Go*

What are we?

On The Go is a standalone app where we cater toward colour-blind users and make their road trips a little more safe. We also have options for those who don't feel safe driving alone and those who don't feel safe driving in general.

Our Goal?

By utilising our features, we aim to make the driving experience of the user a lot more safe and a lot more convenient. We have a multitude of safety precautions for the user such as haptic, audible and visual feedback to help insure the user is safe while also having them pay attention to the road.

Final Visual Executions
